INSTALLATION OF SOLAR ENERGY

We pride ourselves in earning the reputation for providing Solar Efficient Solutions in the need and demand for electricity in the SNEL crisis phase.

The SNEL crisis also means the price of electricity goes up every year.
It is our responsibility to ensure the future of the planet and our generations to follow.

The national energy provider cannot keep up with the growing demand of electricity and coal will be depleted with the rate of consumption currently.

With nuclear energy, nobody wants the reactor on their doorstep. Solar energy is both natural and safe for you and the environment.

2. Import and export

Our Clearing & Forwarding department is an integral part of the Group as its service offering is key to our supply chain. We have joined a strong international network of forwarding agents. We supply any type of equipment needed all over Africa. Whenever the client needs something and decide to contact us; our company still the best offering good services in time and good quality.
